PBSI—Positive Business Solutions, Inc.’s PBSI-EHR – *Off the Charts!* Receives ONC-ATCB Certification by Drummond Group

AUG. 4, 2011—CINCINNATI, OH – PBSI’s **PBSI-EHR – *Off the Charts!*** has received the federal government’s “meaningful use” stamp of approval by earning COMPLETE EHR AMBULATORY CERTIFICATION. The designation officially deems the electronic health record (EHR) software capable of enabling providers to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Tested and certified under the Drummond Group’s Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the EHR software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

“The certification validates that PBSI software can help providers take part in the electronic revolution that is reverberating across the healthcare industry. Healthcare providers can now leverage our software to not only make significant care improvements but to also achieve meaningful use and qualify for incentive funds under ARRA. We are proud to offer providers the opportunity to truly improve care in their communities,” says Teresa Aldrich, PBSI Medical Division Vice President & GM.

Drummond Group’s ONC-ATCB 2011/2012 certification program tests and certifies that EHRs meet the meaningful use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology -- a key component of the federal government’s push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

PBSI-EHR – *Off the Charts!*, which met the requirements for COMPLETE EHR AMBULATORY CERTIFICATION is a market-leading, fully integrated solution for medical offices, with advanced features like patient portal access, wireless clinical data capture, and integration of write-to-text technology and Dragon Medical (integrated speech recognition). PBSI-EHR is flexible and easily customizable by specialty, practice, and provider. PBSI-EHR - *Off the Charts!*, delivers both clinical and financial benefits to practices and is designed with customizable workflow choices - exceling in both features and ease-of-use.

“The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We’re ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the meaningful use standards required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward,” says Rik Drummond, CEO of the Drummond Group. “We have been testing software for more than a decade and are ready to leverage our extensive experience handling sophisticated systems in complex industries as well as dealing with complicated technical issues such as interoperability and security.”

“Physicians today face some very real challenges in moving to electronic records,” says Ray Cool, PBSI President. “PBSI’s focus is to help clients really *use* and *benefit* from this technology, not just install software to meet government requirements.” PBSI, the Preferred IT Partner of the Academy of Medicine of Cincinnati, takes unusual steps to help clients, typically providing 20-30 days of on-site training for a medical office implementing EHR. This helps clients deal with human nature issues that otherwise can frequently cause offices to struggle with such radical changes (no more paper) in office procedures. “It is gratifying to know that the hundreds of PBSI clients already using PBSI’s EHR will now be qualified to receive stimulus funds.” says Cool. “We are truly partners with our clients. Helping clients succeed is a mission-thing, not just a financial-thing.”

This Complete EHR is 2011/2012 compliant and has been certified by Drummond Group, an ONC-ATCB approved to certify any complete or modular EHR both ambulatory and inpatient, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. PBSI-Positive Business Solutions, Inc., August 4, 2011, PBSI-EHR – Off the Charts! version 3.1, 08042011-1258-5, Clinical Quality Measures Certified: NQF0013, NQF0024, NQF0028, NQF0038, NQF0041, NQF0059, NQF0061, NQF0064, NQF0421, Additional software used to certify: email.

About PBSI – Positive Business Solutions, Inc.

PBSI is a leading software developer and knowledge supplier located in Cincinnati, OH. Over the past 28 years, PBSI has built a solid reputation in the regional medical community, by focusing on helping *clients* achieve success. PBSI opened its doors in 1983, with 7 employees and a handful of clients. In the years since, PBSI has grown in depth, talent, and size. Today, PBSI continues to expand, now serving more than 700 physician clients and healthcare organizations in the Tri-State area with software, training and support. PBSI has become the largest developer of ambulatory medical software in the tri-state region, with hundreds of physician clients in Lexington, Louisville, Indianapolis, Cincinnati, Dayton, Columbus, and in many communities in between.
