

Insurance Card Scanning

Instantly accessible...

Use MedicScan™ compact scanner and PBSI software to store both sides of a patient's insurance card in a matter of seconds
...and have instant accessibility to the card image within your PBSI-DOC practice management software!

Benefits of insurance card scanning:

- Increase accuracy of insurance information.
- Decrease claims rejection due to incorrect insurance information.
- Receive claim payments faster—results of accuracy and fewer rejections.
- Enhance employee productivity. Time savings is upwards of 2 minutes per card. In a busy office this can easily represent over an hour per day of recaptured productivity per employee.

Operation of MedicScan™ card scanner:

- Initiate scan from PBSI-DOC's registration screen to connect card image with patient record.
- Scan both sides of an insurance card, 2-3 second scan time per side.
- Scan and store primary, secondary, and photo ID cards for each patient.
- Card images are accessible within your PBSI-DOC practice management software.

Card image displays in PBSI-DOC Registration screen
