

PBSI ePrescribe

"Helping clients succeed with prescription automation"

Certified through SureScripts® pharmacy network, PBSI ePrescribe provides for secure prescription transmissions to pharmacies that have electronic prescription capability.

Heighten your patient service, safety, and satisfaction.

Prescription Automation

- Prescribe from exam room, office, home.
- Scripts – E-sign, print, call or e-fax to pharmacies.
- Cerner Multum drug database built in-w/auto updates.
- Drug-to-drug interaction and allergy warnings.
- E-messaging - quickly review, approve & route requests.
- Print meds, history, allergies, problems for your chart.
- Maintains pharmacy addresses for practice and patient.
- Auto-builds provider's common meds and SIG lists.

Benefits to your practice

- Streamline practice communications with pharmacies.
- Process refill requests with speed and accuracy.
- Increase productivity – using commonly prescribed/protocols.
- Virtually eliminate call backs due to illegibility/confusion.

Benefits to your patients

- Legible prescriptions – less risk of script errors.
- Checks medication interaction and allergy.
- Faster, convenient, perceived as more compliant.
- Enhanced patient safety and satisfaction.

Begin ePrescribing today!

- All PBSI clients can implement PBSI ePrescribe; integrates with PBSI-DOC - no duplicate registration.
- PBSI ePrescribe maintains patient meds, allergies, and problem histories that also are a part of PBSI-EHR.
- PBSI ePrescribe simplifies future use of PBSI-EHR (script history, allergies, problems - already in place).
